Message from the Guest Editors

In this Special Issue, contributions are welcome in biomechanics, ergonomics, medicine, psychology, physiology, rehabilitation, endocrinology, biochemistry, electronics, communications, engineering, or any other discipline that can contribute to identifying problems and pointing out solutions.

High-quality research papers, case studies, and review articles will be accepted using the PRISMA methodology. Experts in the field will review all contributions.

Among others, the following research topics are sought for this Special Issue:

- Firefighters;
- Military personnel;
- Police force;
- High performance;
- Workers subjected to extreme temperatures;
- Occupational physical activity;
- Physical fitness;
- Training and injury prevention;
- Stress reactions;
- Coping strategies;
- Job loading;
- Workplace;
- Fatigue assessment and management;
- Personal protective equipment uses and technical advances;
- Technological systems and their effect on health.

Special Issue

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
