Message from the Guest Editors

Dear Colleagues,

Digital health has the potential to play a role in the prevention, diagnosis, treatment, and management of physical and mental health conditions. As a result of the pandemic, the willingness of both users and providers to use digital health increased, and changes occurred in associated regulations. Digital health offered a ‘bridge to care’, playing a role in the management of the challenges presented by COVID-19, minimizing the risk of transmission through direct physical contact, and providing continuous care in the community.

In this Special Issue, we consider the progress of telehealth since the initial COVID-19 spike alongside the implications for digital health and virtual health going forward. Research in this area might include advanced technical developments, trials of novel solutions, meta-analyses, digital interventions, and innovative technologies (such as virtual reality and augmented reality). Papers may also consider the application of these methods and technologies in particular groups, including populations with long-term conditions, deprived communities, children, and older people.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
