Deadline for manuscript  
submissions:

**closed (30 April 2023)**

### Message from the Guest Editor

As telerehabilitation is increasingly being implemented across patient groups, the research on the patient perspective of telerehabilitation has been fragmented and sparse. This Special Issue welcomes studies or reviews of various telerehabilitation formats, either planned or acute implementations due to COVID-19 pandemic. We are particularly interested in studies:

- (i) addressing how telerehabilitation aims to overcome participation and adherence barriers,
- (ii) focusing on how patients engage with various types of technology,
- (iii) comparing the patients' experience of conventional rehabilitation compared to telerehabilitation,
- (iv) focusing on how telerehabilitation may expand our understanding of what telerehabilitation could entail.

Studies combining two or more of these aims may be of special interest.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
