Message from the Guest Editor

Dear Colleagues,

The past decade has seen an explosion of information concerning the health and environmental impacts of transportation. Transportation has a key impact on our daily lives. The extent to which we recognize how the way in which we travel impacts upon our health and our environment is gaining increasing academic and policy interest. With increases in the use of cycling and other sustainable modes of transport in some areas, more needs to be known on the impacts of these modal shifts.

The objective of this Special Issue is to ascertain the impacts of transport on health and the environment. Papers on new methods to measure this relationship, as well as case studies quantifying these impacts, are welcomed.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
