Deadline for manuscript
submissions:

closed (5 March 2023)

Message from the Guest Editor

Frontiers in Neurourology and Urodynamics, call for papers that conceptually and/or empirically progress beyond today's point of view and present new approaches to elucidating the mechanisms involved in lower urinary tract functioning. With this premise, the recommended topics may include but are not limited to the following:

- Underactive/hypotonic bladder;
- Overactive bladder;
- Stress urinary incontinence;
- New technology applications;
- Interdisciplinary theoretical integration of influences from other organs on bladder functioning;
- Safety and quality issues in relation to new modes of treatment;
- Decision-making and risk management in relation to newly introduced prophylactic approaches;
- Identifying new markers that might improve diagnostic and treatment processes;
- Environmental factors influencing lower urinary tract functions.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
