Message from the Guest Editors

Dear Colleagues,

Digital health describes the use of technologies to support our health and the delivery of healthcare. It is a diverse field of research which includes everything from wearable devices for self-monitoring of activity to the design and implementation of electronic health records, to harnessing technology to strengthen communication pathways between health professionals and the community.

This Special Issue will explore how technology can be used effectively as a support tool across the healthcare system and in the community for health and wellbeing. Coupled with this, articles will also discuss the disconnect between how digital technology could be used to support healthcare and our health and the reality of how it is used in practice. We want to explore the mismatch between real life and the potential of technology to support health and wellbeing. Our vision is to have diverse speakers who challenge us and spark discussions that might help us all to harness technology in different ways for more inclusive healthcare and support.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
