### Message from the Guest Editors

Dear Colleagues,

One of the most profound results of globalization has been the rapid rise in the number of Western-style fast food outlets, brands and marketing around the world. In parallel with the increasing consumption of fast food, processed food and soft drinks around the world, obesity and type 2 diabetes have become global problems, afflicting countries wealthy and poor.

The concurrent spread of Western-style fast food and the epidemic of cardio-metabolic related diseases have raised an important public health question: To what extent does the increased consumption of Western-style fast food contribute to cardio-metabolic diseases, disrupt local food culture, add new burdens to health care delivery systems, create new jobs and economic opportunity, and impact food insecurity?

We are inviting academics, food industry researchers and higher degree students conducting research on food and nutrition insecurity in developed countries to submit abstracts for consideration in this Special Issue of IJERPH.

Prof. Dr. Alice S. Ammerman

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
