

Special Issue

HIV and Other Infectious Diseases

Message from the Guest Editor

Infectious diseases are one of the leading causes of morbidity and mortality in all parts of the world. Deaths from the infectious diseases HIV/AIDS have fallen significantly in recent years, but they are still a leading cause of death in low-income countries. COVID-19, caused by the virus SARS-CoV-2, became a top cause of death in 2020. Infectious diseases have plagued us throughout history, epidemics and pandemics have produced major social/economic impacts on populations. Despite significant advances in infectious disease research and treatment, the control and eradication of infectious diseases face major challenges. This special issue welcomes submissions across the broadest interpretation of these issues, including, but definitely not restricted to, the following:

- Prevention and treatment of HIV/AIDS, particularly among vulnerable subpopulations (e.g., LGBTQ+);
- Infectious diseases control and prevention in different geographic regions, particularly low-income countries;
- Behavioral interventions for infectious diseases control and prevention;
- Mental health and social impacts of infectious diseases.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
