

Special Issue

Antimicrobial Resistance: Tackling This Pressing Global Health Challenge

Message from the Guest Editor

Paper addressing the following topics are invited for the Special Issue:

- Antimicrobial resistance
- Multidrug-resistant clinical and environmental isolates
- Mechanisms of antibiotic resistance
- Environmental microbiology
- Bacterial biofilms
- Infection control
- Antimicrobial peptides
- Antimicrobial nanoparticles
- Innovative antibacterial strategies

Guest Editor

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

Centre for Public Health, Equity and Human Flourishing, Torrens
University Australia, Adelaide 5000, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
