

Special Issue

Biomechanical, Physiological and Psychological Demands and Adaptations of Sports and Exercise Health

Message from the Guest Editor

This research topic seeks to discuss the effects of the demands caused by sports and exercise on the biomechanical, neuromuscular, physiological and psychological adaptations with regard to performance or health benefits. Our hope is that through this research topic, scientists, practitioners, athletes and patients/clients will be able to critically consider the effects of different demands on performance and health outcomes.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
