

## Special Issue

# Public Health during and after the COVID-19 Pandemic

### Message from the Guest Editor

On 11 March 2020, the World Health Organization declared the global pandemic of COVID-19. The significant impact that the pandemic has had on public health has spared no part of the health system. Indeed, scientific evidence shows significant changes in access to primary and specialist care, available resources in terms of healthcare professionals, trends in chronic degenerative diseases, the effects of isolation on children, on adolescents and mental health in general, habits and lifestyles (nutrition and physical activity), delay in early diagnosis, and increased overall mortality. Not least, the pandemic has highlighted even more the existence of health inequalities. This Special Issue of the International Journal of Environmental Research and Public Health (IJERPH) focused on public health during and after the COVID-19 pandemic offers the opportunity to publish original articles dealing with various aspects related to public health. The aim is to offer, through different multidisciplinary approaches, wider knowledge on the effects and consequences of the pandemic and the change in health behaviors.

### Guest Editor

Dr. Paola Borrelli

Department of Medical, Oral and Biotechnological Sciences,  
Laboratory of Biostatistics, University G. d'Annunzio of Chieti-Pescara,  
Via dei Vestini 31, 66100 Chieti, Italy

### Deadline for manuscript submissions

closed (31 August 2022)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.
