

Special Issue

Advances and Trends in Mobile Healthcare

Message from the Guest Editors

This Special Issue will highlight original research on the planning, implementation, outcomes, challenges, and advancements in mobile healthcare. We welcome submissions on a variety of topics related to mobile healthcare, including, but not limited to, the following: Effectiveness of mobile health programs; Access and equity in mobile health services; Economic evaluation of mobile health models; Policy and regulatory implications of mobile health practices; Technology in mobile health units. We encourage submissions from diverse fields such as primary care, behavioral health, infectious disease, pediatrics, cancer screening, emergency preparedness, rural health, and oral health. Community-engaged research is particularly valued, and we strongly encourage submissions from authors typically underrepresented in medicine and public health. Please note that we are not accepting articles for this Special Issue about mHealth, the use of mobile devices for the delivery of healthcare services, with the exception of mHealth efforts used in conjunction with mobile health units.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
