

Special Issue

Tuberculosis (TB) Prevention and Care: A Global Public Health Issue

Message from the Guest Editor

Recent years have seen a considerable elevation of the elimination of tuberculosis (TB) in the global health agenda. With this timely Special Issue on TB prevention and care, we call for original papers that point at understanding those challenges from a multidimensional perspective, assess and quantify the role of existing and novel tools to reduce TB incidence, explore social and behavioural aspects around TB prevention, and research the role of health systems in ending TB. Specifically, our call is open for papers on, but not limited to, the following topics:

- Epidemiological studies assessing the role of TB preventive tools;
- Mathematical modelling exploring End TB scenarios and deployment of novel tools in TB care;
- Assessment and estimation on the impact of novel TB vaccines;
- Transversal aspects affecting TB burden (e.g., sustainable development goals, climate, infrastructure);
- TB policy and decision making around TB prevention;
- Qualitative research around barriers and interventions for TB prevention;
- Health systems and access to care;
- Operational research around TB care services;
- Case studies on TB prevention and care.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
