

Special Issue

Physical Activity on Health Promotion and Disease Prevention among Individuals with Disabilities

Message from the Guest Editor

This Special Issue aims to publish high-quality, multi-disciplinary research which will advance the understanding of issues related to the effect of physical activity on health (physical and mental health) and disease prevention among individuals with disabilities (for example, people with intellectual disabilities, autism, cerebral palsy, visual impairment, or Parkinson's disease). Possible topics include, but are not limited to, the following areas: epidemiological studies in relation to disability; adapted physical education and activity; effects of exercise on health and well-being, ability, and quality of life; accessibility and safety of exercise programs. We hope that this Special Issue will encourage health professionals, parents, coaches, physical educators, and physical education scholars to consider the significance of including disabled people as active participants in more general research studies.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
