Special Issue

Environmental Exposures in Reproductive and Children's Health

Message from the Guest Editors

We are organizing a Special Issue on "Environmental Exposures in Reproductive and Children's Health" in the International Journal of Environmental Research and Public Health.

Despite great progress in fetal and neonatal medicine we still experience on-going epidemics of several negative pregnancy outcomes. Preterm birth, intrauterine growth restriction, and birth defects are still common. On the other hand, a substantial proportion of couples have a problem with conceiving often due to unexplained medical causes. Poor sperm quality is known as one of the reasons and recently, also poor ovarian reserve has been brought to our attention as a possible factor. Nowadays, more and more attention is paid to the long-term effects of environmental exposures during pregnancy, which can be manifested in childhood, adolescence, adult life, and even in the next generation.

We invite investigators with interest in the topic of environmental hazards to reproduction and children's health to contribute to our Special Issue.

Guest Editors

Prof. Dr. Kinga Polańska

 Department of Environmental and Occupational Health Hazards, Nofer Institute of Occupational Medicine, 91-348 Lodz, Poland
 Department of Hygiene and Epidemiology, Medical University of Lodz, 90-419 Lodz, Poland

Prof. Dr. Wojciech Hanke

Department of Environmental Epidemiology, Nofer Institute of Occupational Medicine, 91-348 Lodz, Poland

Deadline for manuscript submissions

closed (31 October 2022)

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

Centre for Public Health, Equity and Human Flourishing, Torrens University Australia, Adelaide 5000, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
