

Special Issue

Environmental Hygiene and Health Promotion

Message from the Guest Editor

In recent years, the changing lifestyles associated with environmental variations in progressive evolution, mainly related to anthropic impact, have favored the onset and spread of chronic diseases, which has become a public health problem worldwide. In fact, the environment plays a substantial role in conveying microorganisms and particles that are toxic to human health in the community, in the workplace, and in health facilities. In particular, in health facilities where high-risk infectious patients are hospitalized, the circulation of microorganisms is responsible for infectious complications that are difficult to resolve.

We are organizing a topical collection about “Environmental Hygiene and Health Promotion” in this Special Issue of the *International Journal of Environmental Research and Public Health*. This venue is a peer-reviewed scientific journal that publishes articles and communications in the interdisciplinary areas of occupational health, safety, and human factors.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
