

Special Issue

Mental Health and Wellbeing in Times of Change

Message from the Guest Editors

In our changing society, it seems important to know the current situation of mental health and wellbeing in a world that is undergoing constant transformation. Digital technologies in our daily lives have already caused profound changes in the way we communicate, with significant impacts (both positive and negative) and the introduction of new risks, such as problematic internet use or cyberbullying. In this sense, the objective of this Special Issue is to analyze the factors associated with the mental health and wellbeing of the population in times of change. Which factors can promote adequate wellbeing? What are the most relevant variables associated with mental health in today's society? This Special Issue "Mental Health and wellbeing in times of changes" invites authors from disciplines such as psychology, public health, medicine, economics, social policies, demography, and sociology, among others, to submit original and review articles related to analyzing the impact on mental health and wellbeing of recent factors in our society. Review papers, policy papers, cross-sectional and longitudinal studies, as well as cross-country studies are welcome.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
