

Special Issue

New Developments in Physical Education and Sport

Message from the Guest Editor

This Special Issue aims to collect the most recent research regarding the social aspects of the physical education classroom, such as the teaching style and motivational classroom climates. It will also cover their influence and relationship on different psychological aspects of students and the relationship with physical activity behaviors outside the classroom. On the other hand, the research regarding different aspects of the promotion of moderate and vigorous physical activity of students, inside and outside the school, as well as for the creation of healthy and permanent physical exercise habits are also important. The analysis of the physical education classroom and the practical proposal for improvements, both in the classroom and its impact on leisure time, is a clear objective. In this sense, it is intended to make a special impact on innovation and pedagogical models. It is related to physical education teachers from different stages and educational contexts and how they are incorporating them into the teaching-learning process due to the results reported in relation to different variables.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
