A Public Health View on COVID-19: Epidemiology, Implications and Responses

Message from the Guest Editors

The novel coronavirus disease 2019 (COVID-19) pandemic has posed unprecedented challenges to the society and the health sector all over the globe. The implementation of public health measures and policies depends on the real extent of COVID-19—also in terms of asymptomatic patients, immune people, and individuals who remain susceptible to the virus. Nowadays, the road to COVID-19 control is still long. With this Special Issue, we want to identify and collect important but still poorly known pieces of the research on SARS-CoV-2 and COVID-19, spanning from epidemiology to public health implications and responses. Possible themes are: advances on the geospatial distribution of the disease; the impact of COVID-19 measured by mortality, morbidity, cost, and other valuable indicators; possible control measures of the disease; the evaluation of national, regional, and local responses to the COVID-19 outbreak; all other public health actions to minimize the impact of COVID-19. We look forward to receiving your contributions, both qualitative and quantitative, on COVID-19 research.

Guest Editors

Prof. Dr. Riccardo Polosa

Dr. Pietro Ferrara

Dr. Luciana Albano

Dr. Venera Tomaselli

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
