Message from the Guest Editors

Dear Colleagues,

The increasing spread of digital techniques for Cultural Heritage with regards to recording, documentation, monitoring, representation, management and valorization by complex information systems, makes an extensive scientific discussion of the methods adopted for data acquisition and processing increasingly important.

This Special Issue aims to present and promote innovative concepts, technologies, methods, and tools in the acquisition and processing of metric and semantic data for Cultural Heritage applications, facilitating the dialogue in the Geomatics scientific community, and in relation to other related research fields, such as computer graphics, conservation, restoration and management of Cultural Heritage.

Prof. Gabriele Bitelli

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Remote Sensing*) / CiteScore - Q1 (Geography, Planning and Development)
