## Geo-Informatics in Resource Management

Guest Editor:

**Prof. Dr. Francisco Javier  
Mesas Carrascosa**

Department of Graphic and  
Geometric Engineering,  
University of Cordoba, 14071  
Córdoba, Spain

Deadline for manuscript  
submissions:

**closed (30 June 2020)**

### Message from the Guest Editor

Dear Colleagues,

Natural resources management requires reliable and timely information available at local, regional, national, and global scales. GeoInformatics, by remote sensing, global navigation satellite systems, geographical information systems, and related technologies provide information for natural resource management, environmental protection, and supporting issues related to sustainable development. Geoinformatics has proven as a powerful technology for studying and monitoring natural resources and in generating modeling for probable scenarios, being an important management and decision-making tool to ensure optimum use of natural resources.

We cordially invite original research contributions on topics including but not limited to the following:

- Satellite, aircraft, and UAV platforms to support natural resource management;
- GIS-based decision support systems for analysis, management and scenario simulations;
- Climatic parameters changes;
- Environmental statistics;
- Land use change;
- Big data and machine learning;
- Location-based services;
- And more.

# Special Issue

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Wolfgang Kainz

Cartography and Geographic  
Information Science, Department  
of Geography and Regional  
Research, University of Vienna,  
Universitätsstr. 7, A-1010 Vienna,  
Austria

## Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [GeoRef](#), [PubAg](#), [dblp](#), [Astrophysics Data System](#), [Inspec](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Remote Sensing) / CiteScore - Q1 (Geography, Planning and Development)
