Deadline for manuscript
submissions:

closed (31 October 2019)

Message from the Guest Editors

In recent years, the amount of data and information with reference to geographic location has increased drastically. Especially with the availability of open source software and free data, the integration of multiple sources of information has become an important issue.

The Special Issue aims at promoting new and innovative studies, experiences, and models to improve the quality of information derived from many different sources.

This Special Issue intends to provide an overview of current research and state-of-the-art processing of information in the context of geographic information systems (GIS). Big data aspects as well as multimodal data acquisition and integration, data and information fusion approaches, and the quality and quantity of topics are some of the possible themes to be covered in this Issue. Authors are welcome to submit manuscripts covering.

Prof. Christine Pohl

Research, University of Vienna,
Universitätsstr. 7, A-1010 Vienna,
Austria

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

Journal Rank: JCR - Q2 (Geography, Physical) / CiteScore - Q1 (Earth and Planetary Sciences (miscellaneous))
