Next-Generation Digital Earth Systems: From Geometric Modelling to Visualization

Guest Editors:

Dr. Faramarz F. Samavati

Professor, Department of
Computer Science, University of
Calgary, 2500 University Drive
N.W., Calgary, AB T2N 1N4,
Canada

Dr. Katayoon Etemad

Research Associate, Department
of Computer Science, University
of Calgary, 2500 University Drive
N.W. Calgary, AB T2N 1N4,
Canada

Mr. Lakin Wecker

PhD Candidate, Department of
Computer Science, University of
Calgary, 2500 University Drive
N.W., Calgary, AB T2N 1N4,
Canada

Message from the Guest Editors

Recent advances in geospatial sensors (e.g., satellites, smartphones, drones, meteorological instruments, and LIDAR) have resulted in technologies capable of collecting large and dynamic geospatial data. The variety, volume, and complexity of these dynamic multiscale data require better data integration, meaningful visualization, and effective user interactions in digital Earth systems. Consequently, we should reexamine these systems and explore their foundations, geometric models, computational methods, and visualization tools to develop next-generation digital earth systems capable of handling the defined challenges.

In this Special Issue, we are interested in research articles aiming to develop new digital Earth systems from geometric and computational models to novel visualization and interaction.

Deadline for manuscript
submissions:

closed (31 July 2021)

Editor-in-Chief

Prof. Dr. Wolfgang Kainz

Cartography and Geographic
Information Science, Department
of Geography and Regional
Research, University of Vienna,
Universitätsstr. 7, A-1010 Vienna,
Austria

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Remote Sensing*) / CiteScore - Q1 (Geography, Planning and Development)
