### Message from the Guest Editors

Dear Colleagues,

Plants are a notable source of natural chemicals, with different structural and biological features that exhibit multifarious mechanisms of action. Various plant species contain myriad secondary metabolites that greatly influence their competitiveness in the environment and protection against adverse growth conditions. These substances are also known to greatly benefit humans and animals.

This Special Issue welcomes papers that address all the aspects related to natural products containing highly efficient and safe substances with long-term health effects. Manuscripts that facilitate the development and application of innovative products will be considered.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
