Morehouse School of Medicine,
Atlanta, GA 30310, USA

Deadline for manuscript
submissions:

closed (30 May 2024)

Message from the Guest Editor

Obesity is clearly related to many types of cancer, but the precise molecular mechanisms remain largely unknown. Does excess body fat/energy intake somehow trigger a normal cell to become malignant, or do fat-produced substances promote growth of malignant cells induced by other carcinogens? Conversely, perhaps some adipokine induces malignant change, and chronic caloric excess is a promoter? What is the exact role of the many molecular processes induced by obesity, including alterations in signaling pathways (p53, Notch, Wnt, and others)? What are the major adipokines driving cancer, and can these be altered by lifestyle changes or drugs?

This Special Issue will explore these and other questions. Appropriate topics include the role of excess calories in cancer as well as the specific activities of various adipokines in the malignant process. Precise information on the fat–cancer connection should stimulate important cancer prevention and treatment clinical research. Therefore, submissions of clinical studies that include biomolecular experiments or pathological research with case sample data are also welcomed.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of
Odontostomatologic and
Specialized Clinical Sciences,
Sez-Biochimica, Faculty of
Medicine, Università Politecnica
delle Marche, Via Ranieri 65,

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
