Experimental Medicine, Sapienza
University, Rome, Italy

Message from the Guest Editors

This Special Issue aims to systematically collect the available evidences of the crucial role of the hypoxia/inflammation axis in various human diseases. Your contributions should be focused in particular on: what the specific genesis of the hypoxic microenvironment is.; what molecular damage pathway(s) are activated; the identification of biomarkers for a more precise diagnosis, damage progression and a predictive prognosis; and suggesting new, non-canonical therapeutic strategies versus traditional therapeutics, even utilizing off-label drugs already available.

Deadline for manuscript
submissions:

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
