Message from the Guest Editor

Epigenetic changes are associated with many clinical indications and health issues. Similar to clinical epigenetics, the liquid biopsy approach primarily emerged in the field of cancer diagnostics. In recent years, other common diseases have also been studied to further implement the concept of liquid biopsy for these clinical indications. The detection of tissue-specific and disease-related epigenetic modifications at the DNA, RNA and protein levels in peripheral blood or other sample types has the potential to provide molecular diagnostic methods to improve clinical decision-making in precision medicine in the near future.

More than a decade ago, epigenomics began with a single DNA methylation marker; now, Grail currently uses more than 100,000 DNA methylation sites for the detection of cancer-specific epigenetics alterations in cell-free DNA from blood plasma. By building on these improvements, in the future, we expect that the combination of epigenetic markers and technical analytical developments will improve the liquid biopsy approach and pave the way for a wide range of innovative applications.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
