Immunology and
Pathophysiology, University of
Rijeka

Deadline for manuscript
submissions:

30 October 2024

Message from the Guest Editor

Dear Colleagues,

Rheumatic diseases encompass a wide range of disorders and conditions caused by autoimmune or non-autoimmune pathogenesis. Moreover, over the last few years, the number of individuals affected by rheumatic diseases has increased, especially in the more economically developed countries. Rheumatic diseases have a great negative impact on health-related quality of life and constitute a major cause of disability throughout the world, with considerable financial and social consequences. Although extensive research into the pathophysiology of these diseases has shown that various factors are involved in their pathogenesis, the molecular mechanisms are still not fully understood, and new knowledge is needed in this field. In addition, insufficient information is available on the relationship between peripheral rheumatic pathogenesis and the affected central nervous system.

This Special Issue is dedicated to the latest advances in autoimmune and inflammatory rheumatic diseases, with the intention of significantly contributing to clinical practice and public health and updating research information on the recent advances in rheumatic diseases.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
