Deadline for manuscript
submissions:

30 June 2024

Message from the Guest Editor

Dear Colleagues,

Dyslipidemia and diabetes increase the risk of atherosclerotic cardiovascular diseases, such as coronary artery disease, peripheral artery disease, and stroke. Various biochemical pathways activated under dyslipidemia and diabetic conditions can contribute to the acceleration of atherosclerosis. It is important to reveal the mechanisms of early characteristic features of atherosclerosis, which is considered to play a crucial role in the development and progression of atherosclerotic cardiovascular disease. For this Special Issue, we invite original research, review articles, rare case reports, and literature reviews on recent progress in molecular mechanisms of atherosclerosis in humans as well as animals.

Dr. Michishige Terasaki

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
