submissions:

closed (30 December 2024)

Message from the Guest Editor

Dear Colleagues,

There have been several advances in molecular and clinical venues that have dramatically changed our view of coagulation and anticoagulation in recent years. This Special Issue invites all works concerning coagulation and anticoagulation that possess molecular aspects and mechanisms. This may include the first clinical trial of new procoagulant or anticoagulant agents, as well as original descriptions of preclinical animal models that detail the pharmacokinetic and pharmacodynamic impacts of such agents. Toxic interactions of organic and inorganic molecules are also of interest, and may take the form of in silico, in vitro, and in vivo models. Original works and review articles are welcome.

Prof. Dr. Vance G. Nielsen

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
