Deadline for manuscript  
submissions:

**closed (20 November 2024)**

### Message from the Guest Editors

Dear Colleagues,

The design of new analogues of porphyrins and porphyrazines with various structures of the coordination center and periphery of the macrocycle, and the determination of their physicochemical properties are perspective areas in the chemistry of the macrocyclic compounds. The modification of the coordination cavity size, as well as the type and number of central atoms, makes it possible to control the specific physicochemical properties. The practical application of macroheterocyclic compounds in new areas, such as nonlinear optics, semiconductor and liquid crystal materials, sensor devices, oncology, etc., requires the expansion of their molecular architecture and methods of its construction. Moreover, it is necessary to increase the number of studies devoted to the determination of the relationship between the geometric and electronic structure of molecules and its reactivity under various external conditions.

We are pleased to invite you to present your works in this Special Issue, which considers experimental and calculated data on the structure of macroheterocyclic compounds.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
