Message from the Guest Editor

Dear Colleagues,

Almost three years have passed since COVID-19 began and the Coronavirus evolution still surprises experts. Aside from long COVID-19 or post-COVID-19 conditions, there are other infections that are still on the rise with increased drug resistance. The challenges of scientists in this century and in the future not only involve improved diagnostics for infectious diseases but also in natural-preventing, medicated-preventing and fastest-innovated treatment methods.

The purpose of this Special Issue is an encouraging contribution to the developing therapeutic treatment combination, the collection of scientific contributions for understanding emerging infectious diseases and the role of the regulation of the immune system. Original articles and extensive reviews are welcome.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
