Message from the Guest Editor

Dear Colleagues,

Osteoarthritis (OA) occurs not only in knee but also in peripheral joints throughout the whole body. Multiple environmental and genetic factors have been shown to be associated with OA, but the complexity of the joint degradation process is not yet fully understood. Recently, a senescence-inducible factor in cartilage has been reported, and the factor was induced during aging, indicating the existence of key factors which induce degeneration of articular cartilage independent from aging and mechanical loading. In this Special Issue, we invite papers on novel molecular mechanisms of pathogenesis of osteoarthritis, including cell cycle arrest, senescence-promoting molecules, and stem cell senescence.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
