Deadline for manuscript
submissions:

closed (30 September 2023)

Message from the Guest Editors

Circulating non-coding RNAs (ncRNAs), including microRNAs, long non-coding RNAs, and PIWI-interacting RNAs, are a class of stable RNAs that do not encode proteins, which can be detected in body fluids, including blood and urine. Several ncRNAs regulate several cellular functions, such as proliferation, apoptosis, and cell cycle progression. NcRNAs have been reported to contribute at various levels of disease pathogenesis, ranging from causative players to modifying factors. Inevitably, their role in human diseases has become apparent. Additionally, emphasis has been given to the role of these molecules as diagnostic, prognostic, and even therapeutic biomarkers of human diseases. Despite the initial difficulties on that front, due to the high intra- and intervariability, many of these discoveries are currently reaching the clinic. In the era of personalized medicine, elucidating the multifaceted role of ncRNAs in human diseases is considered of utmost importance.

This Special Issue invites submissions of original papers and reviews that cover recent advances in the application of ncRNAs as prognostic and diagnostic biomarkers of human diseases and other related subjects.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
