Message from the Guest Editors

Pancreatic ductal adenocarcinoma (PDAC) is a very aggressive tumor with a poor prognosis and inadequate response to treatment. Many factors contribute to this therapeutic failure. Despite extensive translational and clinical investigations over the last three decades, meaningful advances in PDAC therapeutics have not been realized.

Significant research strides in recent years have contributed substantially to our understanding of PDAC. These studies have identified key driver mutations, signaling pathways, and tumor microenvironment interactions that promote disease progression, regulate metastasis, and drive therapeutic resistance.

PDAC treatment should be multidirectional since such an approach would reduce chemoresistance, and in this regard, novel therapeutic approaches are being actively investigated. The spectrum of future options is wide, and the research papers and reviews in this Special Issue will cover recent discoveries in PDAC biology, multiple causes of treatment resistance in PDAC, and possible resolutions to this impasse in the near and far future.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. José L. Quiles

Department of Physiology,
Institute of Nutrition and Food
Technology “Jose Mataix”,
Biomedical Research Center,
University of Granada, Avda.

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
