Deadline for manuscript
submissions:

closed (20 April 2025)

Message from the Guest Editor

Dear Colleagues,

The systems that control the onset and progress of labor are important in understanding the steps involved in birth.

The Special Issue will include manuscripts from contributors containing text that describes various mechanisms regulating uterine contractility and cervical changes leading to the initiation and progress of term and preterm labor and birth. Mechanisms involved in labor and birth pertain to: hormones, drugs to augment or suppress contractility, mechanical and electrical systems that control myometrial contractility, interactions of various uterine control systems, and the regulation of the cervix during labor and birth.

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
