Message from the Guest Editor

Dear Colleagues,

Oxidative stress is known to play an important role in the pathogenesis of many diseases. The neurodegenerative diseases include diseases such as Alzheimer's disease, Parkinson's disease, etc.

Singlet oxygen is an excited state of oxygen O_2 which readily oxidizes cellular components such as lipids, proteins, nucleic acids and others. The energy needed for the excitation of oxygen from the ground to the first excited state $1\Delta_g$, indicating singlet oxygen, is equal to 92 kJ mol^{-1} . For proteinaceous diseases, the calculated ΔG^\ddagger values vary between 92.8 and 127 kJ mol^{-1} at 310K . The similarity of the ΔG^\ddagger values is an indication that a common mechanism may be taking place in the above disorders. We may attribute this common mechanism to the (same) role of the oxidative stress and specifically to that of singlet oxygen ($1\Delta_g$).

This Special Issue aims to present the latest research regarding oxidative stress and neurodegenerative diseases. Both original research articles and reviews are welcomed.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
