Deadline for manuscript
submissions:

20 November 2024

Message from the Guest Editor

Dear Colleagues,

Eukaryotic pathogens are responsible for devastating diseases across the world, and, coupled with that, physicians are limited regarding their use of administering efficacious, tolerable, and non-toxic therapeutic options to patients in need. Moreover, given the lack of vaccinations for such diseases, or even the disposition of drug resistance, humankind heavily depends on anti-parasitic drugs. It is often observed that chemical therapeutics with biological activity against one pathogen may also be effective against another, or others. Thus, this Special Issue aims to identify recent advances from therapeutic drug compounds against eukaryotic microorganisms that cause human disease, which will be showcased and discussed. Submissions of experimental or simulated medicinal chemistry research that focus on the development of either known therapeutics and/or the discovery of novel compounds will be of high priority. Since *Int. J. Mol. Sci.* is dedicated to chemistry and biology at the molecular level, pure clinical studies will not be considered, but clinical submissions with biomolecular experiments are certainly welcomed.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
