Deadline for manuscript
submissions:

30 September 2024

Message from the Guest Editor

Dear Colleagues,

Many proteins are responsible for transmitting signals within cells and facilitating interaction with their neighbouring cells and microenvironment. For example, cellular differentiation, migration, growth, and survival, as well as morphogenesis and organogenesis, are some examples of how cells can regulate themselves, work together with their evolving environments, and respond to external and internal stimulus. Therefore, a wide range of ligands and receptors are paramount in conveying messages and promoting all dimensions of health.

However, dysregulation of these signalling molecules and cascades can lead to the pathogenesis of many diseases. The nature and mechanisms of the defects in these signalling pathways can vary. Improving our knowledge on (1) the different aspects of the signalling pathways that orchestrate normal biological functions, and (2) underlying key mechanisms that contribute to different stages of disease progression, can advance our understanding of disease manifestation and how to target these pathways for therapeutic purposes.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
