Medicine, Semmelweis  
University, Budapest, Hungary

Deadline for manuscript  
submissions:

**closed (25 February 2024)**

### Message from the Guest Editor

The number of patients with chronic kidney disease is growing exponentially worldwide, affecting up to 14% of the adult population. A wide range of damaging factors (e.g., immunological causes, hypertension, diabetes mellitus, acute kidney injury) cause inflammation and scarring in the kidney. Due to the high prevalence of chronic kidney disease and its progression to renal failure regardless of the etiology, it is important to better understand the underlying pathomechanisms.

Unraveling new molecular pathways that participate in disease progression is essential in order to develop better therapeutic strategies. This Special Issue aims to present some novel experimental and clinical aspects of kidney disease pathogenesis and treatment.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. José L. Quiles

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
