Deadline for manuscript  
submissions:

**closed (30 July 2024)**

### Message from the Guest Editor

Dear Colleagues,

Current developments in new polymerization methods and analytical tools have simultaneously created new opportunities for the designing and tailoring of supramolecular polymers and other systems. Based on various non-covalent interactions, these systems can provide not only the selected composition given by a covalent structure, but also are responsive to various stimuli, adaptable, self-healing and, of course, have the desired architecture. This feature is important in biological, biomedical or pharmaceutical applications because life is based on supramolecular organisation. Other possible applications can be found in electronics and optoelectronics, as well as in cosmetics or sensors.

This Special Issue focuses on the synthesis, application and analysis of supramolecular polymers and related systems. Original research papers as well as review articles are welcome to be submitted to this Special Issue.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
