Message from the Guest Editors

Dear Colleagues,

Hematological disorders, either congenital or acquired, are usually heterogeneous and mainly driven by genetic mutations and/or epigenetic alterations. Decoding the molecular pathogenesis, investigating the shifted genetic/epigenetic mechanisms and regulating differential gene and non-coding RNA transcripts' expression may help to determine better risk stratification tools and minimal residual disease profiles. New advanced technologies ensure the accurate quantification of molecular components, underlying the pathogenesis and progression of hematological disorders. However, the distance between advanced technologies and applications in daily clinical practice is currently unbridgeable, due to the high cost and complexity of molecular diagnostic procedures. Precise molecular diagnosis, the recognition of crucial molecular targets for each disorder and the discovery of effective targeted therapeutic agents, are of significant importance and may improve all aspects of clinical practice.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
