Deadline for manuscript
submissions:

31 October 2024

Message from the Guest Editors

Dear Colleagues,

The diagnosis and classification of hematological malignancies and other blood-related disorders are quite critical for disease treatment. The development of flow cytometry and cell sorting-based techniques could play an important role in the improvement of diagnosis of blood cancers in general, and in minimally invasive tissue biopsies in particular. Understanding the diagnostic potential of soluble blood levels of the Brain-Derived Neurotrophic Factor (BDNF) in hematological diseases may also bring great inspiration for scientists.

In this special issue, we would like to call upon researchers, laboratory scientists clinicians, and co-workers in the field of Hematology to share their knowledge and experience in new developments and applications using molecular techniques, such as cell-sorting techniques and flow-cytometry, in hematological malignancies and other hematological diseases. In addition, submissions on the use of soluble protein-based blood biomarkers, which have the potential to improve diagnosis, prognosis, response to treatment, and therapy-related side effects in hematological diseases are also welcomed.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
