Deadline for manuscript  
submissions:

**closed (15 February 2023)**

### Message from the Guest Editors

Natural Killer (NK) as well as Natural Killer T (NKT) cells represent exceptional lymphocyte populations with major tumor-killing activity. NK cells possess activating as well as inhibitory receptors. Most NKT cells recognize the antigen-presenting molecule CD1d. NKT cells are classified into type 1 invariant, type 2 diverse, and NKT-like cells. NK, as well as NKT cells, have been shown to play an essential role in autoimmune diseases as well as in cancer. NKT cells are present in peripheral blood mononuclear cells or cord blood in low numbers but can be expanded in vitro. Most clinical trials with NKT cells have been performed with Cytokine-Induced Killer (CIK) cells. CIK cells are licensed, e.g., in Germany.

Due to their easy availability and potent antitumor activity, NK and NKT cells have emerged as promising immunotherapeutic approaches in oncology and may become very important in the prognosis of cancer.

This Special Issue, “Natural Killer (NK) and Natural Killer T (NKT) Cells in Cancers”, will cover a selection of recent research topics and current review articles in this field. Experimental papers, up-to-date review articles, and commentaries are all welcome.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
