Deadline for manuscript  
submissions:

**31 May 2024**

### Message from the Guest Editor

Extracellular vesicles (EVs), i.e., nanoparticles with a bilayer membrane, are secreted by almost all cell types and can be found in body fluids. The composition of EVs is determined by their biogenetic molecular pathway and the microenvironment of the parent cell. Regardless of their origin, EVs carry a diverse set of bioactive molecules, including lipids, nucleic acids, and proteins, either inside the vesicle or exposed on their surface. Recent studies have provided valuable insight into the physiological and pathological roles of EVs. Technological advances in the detection, isolation, and characterization of EVs are significantly expanding and supporting research on their potential in the diagnosis and therapy of various diseases.

This Special Issue aims to provide comprehensive and critical knowledge on the pre-clinical and clinical applications of EVs in relation to the pathophysiology of different diseases, evaluate their diagnostic and therapeutic potential, and review the progress in this field. The published research articles will also provide new insights into the genetic and epigenetic predictors driven by EVs involved in the etiology of multiple diseases.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Maurizio Battino

Department of  
Odontostomatologic and  
Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of  
Medicine, Università Politecnica  
delle Marche, Via Ranieri 65,

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
