

Molecular Biology of Stem Cells

Guest Editors:

Prof. Dr. Jacek Z. Kubiak

Dynamics and Mechanics of Epithelia Group, Faculty of Medicine, Institute of Genetics and Development of Rennes, University of Rennes, CNRS, UMR 6290, 35043 Rennes, France

Prof. Dr. Malgorzata Kloc

1. The Houston Methodist Research Institute, Houston, TX 77030, USA
2. Department of Surgery, The Houston Methodist Hospital, Houston, TX 77030, USA

Deadline for manuscript submissions:

closed (30 September 2024)

Message from the Guest Editors

Stem cells are at the center of interest in modern biology because of their importance in developmental and regenerative processes and potential applications in regenerative medicine. The full understanding of the molecular mechanisms involved in the stemness and directed cell differentiation towards a particular cell fate have key importance for the understanding of the plasticity of embryo development, functioning of young and adult organisms, numerous pathologies including cancer, aging, regeneration processes, and their biomedical applications, which will revolutionize the field of medicine.

This Special Issue entitled “Molecular Biology of Stem Cells” is focused on processes and molecular mechanisms governing stemness, different states of stem cell potency, and stem cells’ directed differentiation into particular cell types. We encourage submitting original articles, review articles, perspectives/opinions, and methodology articles about all types of stem and progenitor cells, their propagation, differentiation, and potential use in medicine.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
