Deadline for manuscript  
submissions:  
**closed (20 March 2024)**

### Message from the Guest Editors

Dear Colleagues,

Neurodegenerative diseases are among the major health conditions that affect neurons in the human brain and result in the progressive degeneration or death of nervous system cells.

To date, among the therapeutic strategies to reduce the progression of these diseases, nutritional strategies, mainly aimed at alleviating the symptoms of patients, such as inflammation, metabolic alterations, dysbiosis of commensal microbiota, and loss of neuronal structures, are highly relevant and have already proven to be beneficial for some patients.

This research topic aims to collect original research studies, reviews, and case reports which focus on new nutritional strategies to improve patient well-being. Furthermore, we also aim to collect studies that focus on the biological mechanisms of the activity of supplements, nutraceuticals, and other alternative medicine approaches that have the potential to significantly influence the health and quality of the lives of patients affected by neurodegenerative diseases.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
