submissions:

30 July 2024

Message from the Guest Editor

Dear Colleagues,

Intrauterine growth restriction is one of the most important pathological conditions in obstetrics. It can be caused by maternal, fetal and environmental factors, though the most common etiology is placental dysfunction. The placenta transports oxygen and energy to the fetus, but also transmits numerous endocrine signals for the pregnant woman and for the fetus as well. As the placenta ensures the oxygen and nutrient demand is met for intrauterine growth, genes involved with growth control can be representatively examined from placental tissue. Among the many genes involved, those influencing metabolism, angio- and vasculogenesis, placental growth, apoptosis, and glucocorticoid metabolism are of highest significance.

At present, little is known about the molecular mechanisms leading to the development of IUGR. However, several growth factors have been implicated and an important role for multiple growth factor-related gene families and other specific genes has been firmly established.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
