Message from the Guest Editors

Dear Colleagues,

This Special Issue entitled "Myogenesis and Muscular Disorders" will comprise articles and reviews related to, but not limited to, the following topics:

- Myogenesis and SCs modulation in muscular diseases.
- Novel targets involved in (transcriptional, post-transcriptional, and post-translational) regulation of muscle regeneration.
- Use of small molecules to activate SCs.
- Role of SCs (metabolism) in the development of muscle diseases.
- Effects of nutrients, hormones, and exercise on promoting muscle regeneration.
- Modulation of the inflammatory response as a potential therapeutic strategy to counteract the loss of SCs.
- Efficacy of combined pharmacological and cognitive-behavioral therapies.

We look forward to reading about your insights and exciting discoveries that further advance our knowledge of this topic.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
