

Molecular Mechanisms of Somatic Cell Cloning and Other Assisted Reproductive Technologies in Mammals

Guest Editors:

Prof. Dr. Marcin Samiec

Department of Reproductive Biotechnology and Cryoconservation, National Research Institute of Animal Production, Balice near Kraków, 32-083 Balice, Poland

Prof. Dr. Maria Skrzyszowska

Department of Reproductive Biotechnology and Cryoconservation, National Research Institute of Animal Production, Balice near Kraków, 32-083 Balice, Poland

Deadline for manuscript submissions:

20 November 2024

Message from the Guest Editors

In summary, this Special Issue provides the possibility to publish research articles, comprehensive reviews and short communications focused on exploring or recognizing an extensive range of biological, molecular, genetic and epigenetic determinants profoundly affecting the efficiencies of somatic cell cloning and other ARTs at the levels of nuclear donor cells (somatic and stem cells), male and female gametes (spermatozoa and oocytes) and in vitro- or in vivo-produced embryos. Thorough identification of the aforementioned determinants can contribute greatly to the amelioration, optimization and implementation of SCNT-, IVF-, and ICSI-mediated IVP approaches as well as a wide array of ARTs involving the procedures of in vivo embryo production. This is the predominant prerequisite for the enhancement of practically applying the above-indicated strategies as important, reliable and feasible ARTs for the purposes of experimental and applied embryology, biotechnology, ex situ biodiversity preservation, transgenics, biomedicine, biopharmacy and the creation of animal models for the etiopathogenesis and pathophysiology of human diseases.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
